

# Active rehabilitation

**Neuron**

# Welcome to Neuron!

**T**he Finnish Brain Research and Rehabilitation Center Neuron is dedicated to develop and study new and more effective methods for neurological rehabilitation. Our goal is an effective and individual rehabilitation strategy for each and every customer.

## Our services at Neuron in Kortejoki:

- individual inpatient rehabilitation
- assessment for vocational rehabilitation
- adaptation training

In addition you are welcome to use our outpatient clinic Kupoli located in the city center of Kuopio.

Our services may be purchased through The Social Insurance Institution of Finland (Kela), insurance agencies, municipalities or by individual customers.

## Individual inpatient rehabilitation

For persons with severe neurological disability due to a disease or an injury. We are specialized in neurological rehabilitation, particularly after the most acute phase of the cerebrovascular incident.

## Assessment for vocational rehabilitation

Neurological, psychological, physical and social assessment of rehabilitation needs for persons whose working capacity is impaired.

## Adaptation training

Group therapies for adaptation to cope with chronic neurological or psychiatric disease.

## Outpatient clinic services

For physical therapy, speech therapy, occupational therapy and neuropsychological assessment and therapy.

**Stroke • Muscular diseases • Brain trauma • Multiple sclerosis • Parkinson's disease**

Kuopio – Neuron 30 km  
 Airport – Neuron 19 km
